

Course Name: WSDOT ENV: Spill Plan Reviewer Training (OLT)

Description: This course helps WSDOT staff evaluate Spill Prevention Control, and Countermeasures (SPCC) Plans. The Construction Manual requires staff to take this course before reviewing spill plans. This course focuses on the overall basics of spill prevention to ensure compliance with WSDOT Standard Specification #1-07.15(1). The participants will learn how to use available tools and templates on the Spill Prevention webpage to evaluate the required 10 SPCC elements.

Training Objectives: Upon completion of this course, participants will be able to:

- 1) Understand of the Spill Prevention, Control & Countermeasures Plan (SPCC) requirements under the Standard Specification 1-07.15(1).
- 2) Use the Spill Plan Reviewer resources to determine if a spill plan meets the requirements.
- 3) Apply SPCC requirements while reviewing spill plans.

Subject Matter Expert: Trent Ensminger

E-Learning Developer: [Virginia Stone](#)
