

Corridor Program

Congestion Relief & Bus Rapid Transit Projects

"I just wanted to thank the DOT for the new I-405 lane in Bellevue. My morning commute from Renton to Eastgate used to take 45 minutes to go 4 miles. The change since the lane opened has been nothing short of miraculous—it has cut at least 20 minutes from my commute every day. I have never seen such an effective traffic improvement. Nice work!" - Bill G.

"I can't tell you how excited I am to have that ramp AND the lane open. What a DIFFERENCE that makes! It is just great, and I know I speak for legions of commuters in saying thanks for all the work that went into that improvement, it is just huge." - Barbara V.

"I second all of the comments about the DRAMATIC improvement on northbound 405 in the AM. Hard to believe that increasing the capacity in that little stretch between 112th and I-90 could have that big of an impact on the whole stretch (back to 167) but it has! Keep up the good work." - Mark N.

"I just wanted to commend the widening work done on I-405 at the I-90 interchange/Bellevue area. The planning and construction crew were awesome. That was a huge job however over the months of construction there was minimal impact to traffic and there was visible progress made daily (I hate it when you don't see progress on a job for days on end). I just wanted to say thank you and job well done!" - Cindy
